

Coating Thickness Adjustment Systems

T-Bar DIE

Coating Thickness Adjustment T-Bar DIE

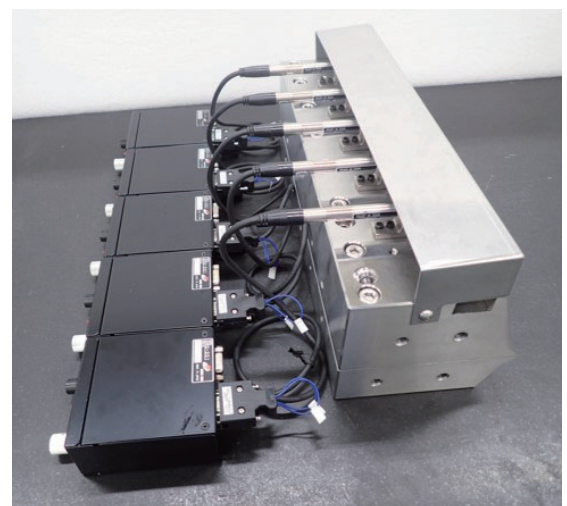

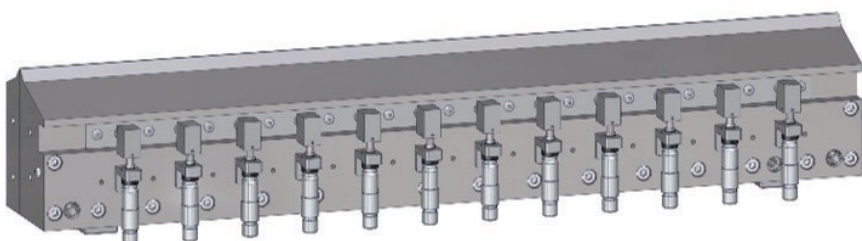

Besides Bolt type adjustment system and Oil pressure type one, we have lined up brand new adjustment system, "T-Bar" this time.

Superiority

[Advantage compared to existing Chokebar type]

- Horizontal micrometer heads
==> High coating activity with enough upper space
- Fine-tuning block
==> Micron accuracy coating
(Min 1/10 fine tuning available compared to existing one)

Automatic coating control system available with actuator.
