

BF407 Face milling cutter for aluminum alloys

Feature

- Increased welding resistance due to the sharp cutting edge geometry.
- High efficiency can be achieved due to the increase in the number of cutting edges.
(Number of cutting edges = 1.6D)
- Can employ both high accuracy A class inserts and economical C class inserts.

Parts

Order number					
		①	②	③	④
BF407 R/L	0305C~0406D	CWSF407 TR/L1	LS15T	CAS51T	TKY25T
	0508E~1218P	CWSF407 TR/L2			

※Please specify the order number when placing an order.

<Caution>

Please do not move the set screws. as this will result in the deterioration of runout accuracy.

When handling the tool, please be careful as the cutting edges are very sharp.

When changing the inserts, please use compressed air to clean the seat.
